

YurClip

Head-of-wall deflection conditions

Used in head-of-wall deflection conditions for interior, non-load bearing walls.

These clips are used in combination with deep leg deflection track. Saving labor time, they do not require screws in the stud or bridging installed continuously throughout the upper most punchouts. YurClips can be installed on the deflection track or on the stud first. Perfect for situations where screws cannot be installed,

CLIP THICKNESS

Thickness: 0.035" Nom. Thickness

MATERIAL SPECIFICATIONS

Material: Annealed Spring Steel with clear zinc electroplate
ASTM: C1070

INSTALLATION

Installed by pressing in place or tapped with a hammer. No fasteners required to deck or floor. Can be installed on track or on stud then slid onto track with pry bar. Two windows for layout marks. Adjustable for layout errors or changes and no screws or drills required. Perfect for situations where screws cannot be installed. Studs work in clip either way.

YurClip (YDC)

Product code	Stud Size	Clip Size (in)	Pcs./Ctn.
YDC2.5	2-1/2"	1-1/4 x 2-1/2 x 1	100
YDC3.625	3-5/8"	1-1/4 x 3-5/8 x 1	100
